

Brian Quinn
Chemist V

Brian is responsible for aiding in the efficiency of running processes and equipment alike. He engages in helping make whatever preparations are needed for the growth and maintenance of the company's projects. Brian has a bachelor's degree in Biology from Quinnipiac University and nearly 15 years of experience in pilot and large-scale commercial drug manufacturing in cGMP facilities with companies such as Genzyme, Amgen, and Alexion Pharmaceuticals. Brian has held leadership roles as well as individual contributor roles throughout his career. After obtaining a certificate of completion for the electrician course from Penn Foster University he went on to become a licensed Photovoltaics (Solar) installer in the state of Connecticut for Real Goods Solar. As a foreman and installer he gained valuable insight into the field of alternative energy and project management. Brian makes his home in Southeastern Connecticut with his wife and two beautiful sons. He is passionate about family, friends, and the great outdoors and is very happy to be a part of Nalas Engineering Services.
